
Session Unwritable Error

Posted by brookh - 2007/10/05 20:16

I was able to find the answer at:

<http://www.sugarcrm.com/forums/showthread.php?t=12826>

Create or edit a .htaccess file in the httpdocs root directory.

Add this line: `php_value session.save_path '/tmp'`

Create a directory in the httpdocs folder named "tmp".

Change the permissions to 777 to allow writing.
